

Centara is one of the fastest point-of-sale systems on the market. Lower total cost of ownership and improved productivity are the main elements to look forward to when setting up Centara.

Flexible on-screen menus and tailor-made manager functions along with extensive reporting abilities and reliability, give Centara the leading edge managers are searching for when choosing a system.

Intuitive design and user interface cuts down training time enabling managers to make the most of the system and allows for effortless sales, adding items or adjusting prices.

The system operates on most known POS hardware and easily communicates with other software.

SIMPLE INVENTORY

Centara favours using the underlying inventory system of the customer's ERP solution, but for stand alone stores and customers with simple needs, Centara can offer the Simple Inventory module.

Centara Simple Inventory is a stand alone solution, easy to monitor in regard to replenishing goods, adjusting prices and making simple inventory count.

- Stand alone system
- Quickly assess inventory levels
- Stock look-up at POS
- Cost of goods entry and adjustments
- Rudimentary FIFO cost calculation
- Multiple store locations with single inventory per store
- Transfer items between inventory locations
- Inventory count
- Shrinkage adjustments
- Unlimited transactions
- Data analysis with BI tools
- Easy to use

SIMPLE INVENTORY

Centara has a simple inventory module built in for small stand alone stores needing simple inventory count.

The Centara Simple Inventory follows the FIFO inventory principle and is very easy to use, offering different stock locations, inventory lists and simple adjustments to volume and price.

Possible to manually type in cost prices upon receiving the order, and thereby tracking a simple version of "cost of goods sold".

The data compilation of Centara offers a vast field of information for further analysis or study with standardized business intelligence tools.

Standard BI tools allow for even more comprehensive reports for sales accounting, determining the best and worst sales items, breakdown of sales or other parameters in reference to time-periods, staff and POS comparison.

Supermarket chains can also collate reports from various locations and send to headquarters. This can be done daily or more frequently.

RECEIVAL OF GOODS

With Centara Simple Inventory, receiving orders is made easy. Simply enter the quantities and adjust the cost prices if needed. Check to make sure the items are correct. If needed make necessary corrections in the Simple Inventory.

DON'T OVER-ORDER

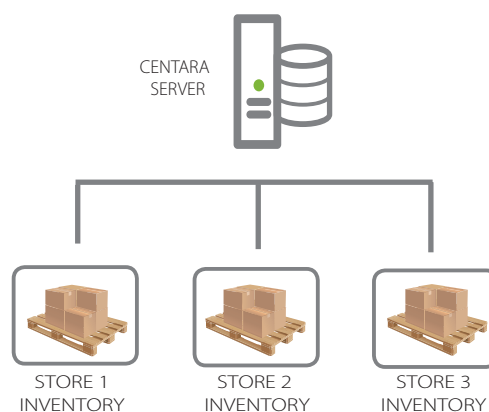

If you're a new business owner, be smart and only order what you expect to sell in a certain period. With Centara you can always analyze daily if you're going to run out of inventory and then prepare reordering. Once you have a few months under your belt, you can use that history to determine what you'll need to order.

INVENTORY = CASH

The key to finding the correct inventory levels for your company is determining the right balance between tying up your assets in slow-moving inventory, and also being able to meet your company's stock requirements.

Utilize Centara's quantitative measurements and well-considered forecasts in planning your inventory.
